## Motorola router default password sbg6580

If you have a Motorola Surfboard SBG6580, below is everything you need to know about the default password and how to reset the login information if you forgot the SBG6580 password. Default SBG6580 Log Password On You can access the Surfboard SBG6580 web manager with any browser and use the IP login address. Remember to use Internet connection when you sign in to your router to change settings, this way you ensure that the changes are put in place and no data is lost. If the default log IP address isn't working, consider going for a hard factory reset so you can configure your modem. User name and admin password: Default IP login address: 192.168.0.1 Default user name: admin default password: motorola Default logins for Motorola 65 % IP address: 192.168.168.1 1 Username: admin Password: motorola 13 % IP address: 192.168.1.1 Username: motorola Password: admin 9 % IP address: 192.168.0.0.1 Username: admin Password: Motorola 9 % IP address: 192.168.1.254 Username: - Password: admin 4 % IP address: 192.168.0.1 User Name: Motorola Password: admin Motorola SURFboard SBG6580-G228 Router Login to sign in as Admin at Motorola SURFboard SBG6580-G228 Router uses the folder below. Connect your PC or laptop via cable to your router. Or use your wireless network instead. Suggestion – It is recommended that the connection should be done using a cable attached to the Motorola SURFboard SBG6580-G228 router. This will prevent you from losing connection in the middle of the configuration/setup process. Using a web browser of your choice and entering the IP address of your SURFboard SBG6580-G228 router into the address bar, you will load the login screen. You can find the ip address on the back of your router. Now enter the default user name and password of your router and you'll be granted access to its admin panel. If you don't happen to know what the username and password are then feel free to check out some of the default ones for SURFboard SBG6580-G228 routers by Motorola. Motorola SURFboard SBG6580-G228 Routers Support If you have problems logging into a SURFboard SBG6580-G228 router, then you're probably using the wrong username or password. Don't forget to save the login details after you reset them. Forget Login Password? Try the hard recovery feature. To do this, press and hold the small black button usually located behind your router case for about 10 seconds. By doing this, your router will be reset to the factory settings. Router sign-in page? If for some reason the admin webpage fails to load, check to see if the device you're using is connected to the wi-fi. You can also look up which exact IP address is set as defaults for the router. In many cases, problems have been associated loading the login screen of the router associated with it with another IP from the one attempting to be loaded. In this case, your network definitely uses a different IP address. If that's the case, review our IP address router list and find right address. If you need any help, check out our tutorial on how to find your router's IP address. Here you can find the default IP address and the user name and password for the user interface of the ARRIS SBG6580 Cable & Wi-Fi Modem router. This site also contains information about the pre-configured Wi-Fi settings of the device. In the lower part of this site, you will find a tutorial to access the user interface of this router and reset its factory settings. Access to the user interface is necessary when you want to change the router configuration. For the ARRIS SBG6580, you must take the following steps for access: Turn router On set up a connection between the device and the router via Wi-Fi\* or network cable Open web browser Enter IP address in the address bar, and then confirm with 'Enter' key Enter username and password in the open interface and confirm again \* Make sure your router's Wi-Fi is enabled. Retry default settings is especially useful when you've changed and forgotten the login data for the user interface. Please consider that not only will settings such as IP address, user name, and password be set to factory settings, but all configurations you may have made will too. Perform hardware reset To restore the ARRIS SBG6580 to its default settings, you must take the following steps: Put router in operation Press Reset button for at least 8 seconds Device is automatically restarted Router is reset to factory settings Import software recovery With the ARRIS SBG6580, you can restore the factory settings with the installed software. Sign in to the user interface of the router with your access data and perform the steps described in the user textbook. After you successfully perform the steps mentioned above, the configuration of the router will be reset to factory settings. If you want to sign in to the user interface, you must use the preset login data. This page shows you how to sign in to the Motorola SBG6580 router. Other Motorola SBG6580 Guides Find your Motorola SBG6580 Router IP address We need to know the Internal IP address of your Motorola SBG6580 router before we can sign in to it. Motorola SBG6580 IP addresses 192.168.0.1 If you have not seen your router ip address in the list above. There are 2 additional ways you can determine your router's IP address: You can either follow our How to find your Routers IP address directory. Or you can use our free software called Router IP address. Now that you have your router's internal IP address, we're ready to sign in to it. Subscribe to the Motorola SBG6580 Router The Motorola SBG6580 has a web interface for configuration. You can use any web browser that you would like to sign in to the Motorola SBG6580. In this example, our Internet Explorer will Enter Motorola SBG6580 Internal IP address, insert the internal IP address of your Motorola SBG6580 into the Address bar of your web browser. It looks like this: Then press the Enter key on your keyboard. You You See a pop-up dialog box asking you for your Motorola SBG6580 username and password. Motorola SBG6580 Default Username and Password You need to know the username and password to sign in to your Motorola SBG6580. All the default user names and passwords for the Motorola SBG6580 are listed below. Motorola SBG6580 Usernames Motorola SBG6580 Passwords admin Motorola Enter your username and password in the dialog box that appears. It looks like this: Motorola SBG6580 Home Screen You should now see the Motorola SBG6580 Home Screen, which looks like this. If you see this screen, then congratulations, you are now signed up to your Motorola SBG6580. You are now ready to follow one of our other guides. Solutions for Motorola SBG6580 Sign-in problems If you can't be signed in to your router, here are some possible solutions you can try. Motorola SBG6580 Password does not work you must try other Motorola passwords. We have a large list of Motorola Passwords that you can try here. Perhaps your router's default password is different than what we've listed here. Forget password after Motorola SBG6580 Router If your Internet service provider provides you with your router then you might want to try giving them a call and see if they either know your router's username and password, or maybe they can reset it for you. How to reset the Motorola SBG6580 Router to default settings If you still can't be signed in, you'll probably need to reset your router to its default settings. You may want to follow our guide called How to Reset your Router. Other Motorola SBG6580 Guides Here are some of our other Motorola SBG6580 information you might be interested in. When attempting to access the SBG6580 configuration menu, ask the port for a user name and password. By default, the user name is admin, and the password is motorola. However, the gateway admin account user name and password can be changed. NOTE: If the port cannot be accessed using the default credentials (mentioned above), and the user name and password are unknown, the port will only be accessible by doing a factory reset. Keep in mind that a factory recovery will delete any custom settings, and may cause the Internet to be inaccessible. For instructions on how to do a factory reset, please refer to Reply #20815 - SBG6580: Factory Repair. Password considerations: Passwords are case-sensitive, and must be 1 to 8 characters long. Passwords cannot contain the following characters (#,!,\$,@,\*,). Passwords take effect immediately. Restarting the port is not required for the password to take effect. Assigning an administrator password does not affect communication on the Internet. NOTE: Before changing the user name and/or password, it is recommended to back up the configuration. To use the to back up, please refer to Reply #20837 - SBG6580: Configuration Backup and Restore. Access to the Status Security Page WARNING: It is recommended to keep record of the new user name Password. If the user name and/or password are unknown, the configuration menu for the SBG6580 will be inaccessible. Start a web browser, such as Internet Explorer, Firefox, or Safari. Type in the Address box. NOTE: By default, the LAN IP address is 192.168.0.1. If the default address has been changed, enter the custom address in the address box. Enter admin in the User name field. Enter motorola in the password field. Click the Sign-in button. The Status page appears. On the SBG6580 Status page, click the Security button in the left menu. The Status Security page will appear. Verify if there is a drop-down list that says Change user name (as shown below).
